

## 8A 期末复习--语法专项之语篇词转

### A

Life in the past was very different from what it is today. Back then, most people made their own clothes by hand and grew their own vegetables. They \_\_\_\_\_ (rare) bought things from the market, and communication was slow-people usually wrote letters that took days or even weeks to arrive.

Nowadays, life has changed greatly. We can buy all kinds of clothes in stores and enjoy a \_\_\_\_\_ (widely) variety of food from all over the world. Travelling has also become much easier. Many people take long \_\_\_\_\_ (journey) to other countries for holidays. Thanks to \_\_\_\_\_ (modernize) technology, we can communicate with others instantly through mobile phones and the internet. For example, in \_\_\_\_\_ (educate), students can now watch video lessons and submit their homework online easily.

Entertainment has changed a lot, too. In the past, people had fewer ways to have fun. They often read books, told stories, or played simple games. Today, we have television, computers, video games, and social media to keep us \_\_\_\_\_ (entertain) every day.

However, modern life is not always easy. The fast pace often makes people feel stressed, and many have less time to spend with their families. Still, most of us enjoy the \_\_\_\_\_ (convenient) and richness that modern life brings. It makes our world more colourful and connected.

1. \_\_\_\_\_ 2. \_\_\_\_\_ 3. \_\_\_\_\_ 4. \_\_\_\_\_  
5. \_\_\_\_\_ 6. \_\_\_\_\_ 7. \_\_\_\_\_

### B

Last month, our science teacher assigned us an exciting project: designing a future green city. My partners-cheerful Emma, thoughtful David, and I-all wanted to win \_\_\_\_\_ (eager), yet we couldn't agree on the main feature. David proposed smart recycling systems while Emma argued for rooftop farms. As time was running out, I grew quite \_\_\_\_\_ (disappoint) and feared we might not complete it.

Our teacher Mr Li noticed our frustration during preparation. "A team," he reminded

us, "is like a garden-different flowers make it beautiful." Inspired, we sat down to \_\_\_\_\_(discussion) a better plan: David built recycling centres, Emma created vertical (垂直的) farms from plastic containers, and I designed bicycle roads. Throughout the process, nobody made a single \_\_\_\_\_ (complain).

The presentation day arrived. Emma, our lead representative, \_\_\_\_\_(be) usually quiet in public. David and I helped her practise repeatedly after school. When she finally stood on stage, everything went \_\_\_\_\_ (perfect). As she explained how our city used renewable energy, the whole class clapped warmly for our innovative (新颖的) design.

We eventually won the competition, but what mattered more was realizing that teamwork means embracing different ideas. By \_\_\_\_\_ (respect) each member's strengths and working together patiently, we discovered that the best solutions come from combining our unique perspectives.

5. \_\_\_\_\_ 6. \_\_\_\_\_ 7. \_\_\_\_\_

### C

When I was a child, I dreamed of becoming a pilot. I'd look up at the big blue sky and imagine myself flying through the clouds. The feeling of freedom and adventure from flying really \_\_\_\_\_(interesting) me a lot.

Everyone thought it was an \_\_\_\_\_(able) dream for me because of my poor eyesight. The absence of perfect vision made it seem \_\_\_\_\_(possible). My teacher told me it was \_\_\_\_\_ (probable) not going to happen, and it was unlikely that I would have to choose another path. This made me very sad. One day, I saw a bird \_\_\_\_\_ (flight) freely in the sky, and I knew certainly that I needed to find a different way to be close to the aviation (航空) world.

Now, as an aircraft designer, I am very happy and satisfied. It's \_\_\_\_\_(believe) how I can help the aviation world in a really meaningful way! I use my creativity and thinking skills to solve hard problems and shape the future of flying.

Every time I see a plane I helped design take off, I remember that sometimes the

most satisfying roads aren't the ones we first think of. Instead, they're the \_\_\_\_\_  
(positively) paths we find when one door closes-leading us to a window with a much  
wider view.

5. \_\_\_\_\_ 6. \_\_\_\_\_ 7. \_\_\_\_\_

## D

Life in the future: A technological landscape For years, scientists and writers have  
tried to guess what daily life will be \_\_\_\_\_ in the future. Many people think  
technology will be \_\_\_\_\_ (close) connected to our homes and cities, making many  
tasks automatic. This is \_\_\_\_\_ (expect) to make things more efficient and give us  
more free time. However, how this technological change will exactly affect our social  
habits and personal health is still a topic people talk about.

Many experts agree that the idea of the "smart home" will become common. Our  
home machines will communicate \_\_\_\_\_ each other, managing energy use and  
safety smoothly. What's more, the development of artificial intelligence is predicted to  
do difficult jobs-from driving our cars to finding out \_\_\_\_\_ (ill). This may bring  
big changes to the job market, so people will need to get used to it and learn new  
skills.

Although there may be good points, this future also has challenges. A big worry is  
privacy because the devices that make life easier also collect a lot of personal  
information. Another problem is the digital gap: such \_\_\_\_\_ (advance) technology  
might become something expensive, which makes the difference between different  
social groups bigger. So, when planning for a high-tech future, it's very important to  
\_\_\_\_\_ (solution) these social and moral problems to make sure progress helps  
everyone.

### **The Power of Teamwork In a Company**

ABC Company Is a well-known company that produces\_\_\_\_\_ (electricity) products. In the past, the company faced many problems. Tho departments didn't communicate well with each other, and there was a lack of teamwork. As a result, the work \_\_\_\_\_ (efficient) was low, and the products didn't meet the market's \_\_\_\_\_ (need).

The new manager realized the problem. He decided to take some \_\_\_\_\_ (measure) to improve teamwork. First, he organized team-building activities for all employees. These activities helped the employees get to know each other better and build trust. Then, he set up a communication system. Each department had regular meetings to share information and discuss problems. The employees were \_\_\_\_\_ (encourage) to express their opinions and work together to find solutions.

With the \_\_\_\_\_ (improve) of teamwork, the company's situation changed greatly. The work efficiency increased, and the products became more popular in the market. The company made more profits and became more \_\_\_\_\_ (competition). The success of ABC Company shows the power of teamwork. Now, employees support each other like a big family. They are proud of their company and work even harder. The future looks bright for ABC Company as they continue to grow and succeed together.
