#### Tips for water-saving and water-protecting

- Collect cold water first: When you're heating water for a shower , put a bucket under the tap. You can use it to water (1)\_\_\_\_\_ plants in your garden.This way, you save water and help your plants grow well.
- Take (2) \_\_\_\_\_ showers: Set a timer and try to take showers in 5-7 minutes. The less water you use , the more you help our Earth.
- Use devices smartly: Don't run dishwashers or washing machines when they're not full, Using them with a half-load wastes a lot of water. Whenever possible, wait (3) \_\_\_\_\_ you have enough dishes or clothes for a fuller cycle.
- Find and fix leaks: Check your pipes, faucets , and toilets often. Even a small leak can waste a lot of water. If you find a leak, fix it right away. This is a big step (4) \_\_\_\_\_ in saving water.
- Try to (5) \_\_\_\_\_ grey water: Grey water is the water from sinks and showers, Use it to flush toilets or water plants in your garden. This helps keep the plants from drying out and saves fresh water for other important things.
